-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on 04 December 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "tortuousness" of claim 17 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9,11-15,18-20 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Mochizuki 5579178.

Art Unit: 2872

These claims stand rejected as discussed in the previous office action. Regarding new claim 23, note that Mochizuki's item 30 does not rotate relative to item 'A' as shown in the annotated fig. 1 attached to the previous office action.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mochizuki.

These claims stand rejected as discussed in the previous office action.

***Allowable Subject Matter***

6. Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2872

7. Claims 21 and 22 are allowed.

8. The following is a statement of reasons for the indication of allowable subject matter: applicant's remarks concerning new claims 21 and 22 are persuasive.

### ***Response to Arguments***

9. Applicant's arguments with respect to claim 1 have been fully considered but they are not persuasive.

Applicant has argued that Mochizuki "neither discloses or suggests a motor base that the [sic] is mounted to the case which includes a second fitting portion that is separate from the rest of the motor base such that the case and the motor base are rotatably supported along the vertical direction of the shaft by the first fitting portion."

However, the claims do not recite the second fitting portion to be "separate from the rest of the motor base" as applicant has alleged. Thus, this argument is without merit. Further, Mochizuki's case and motor base are indeed rotatably supported about the shaft. Thus, Mochizuki's device meets the structural requirements as set forth in the claims.

Applicant has further argued with respect to the drawing objection that "tortuousness" is indeed shown in fig. 1. However, the interface between the second fitting portion and

Art Unit: 2872

the shaft is shown in fig. 1 to be a straight line along the shaft diameter direction (i.e. the shaft top or horizontal surface). Thus, it cannot be ascertained from fig. 1 that "tortuousness" is present at this interface.

### ***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
